

Scientific Studies Conducted on Products:

1. Perez, Vanessa, et al; "Evaluation and Quantitative Microbial Risk Assessment of a Unique Antimicrobial Agent for Hospital Surface Treatment"; Nov. 14, 2014., [A nine month clinical trial at the Oakwood Hospital System, amassing 60,000+ cultures bio-statistical data concludes a HAI reduction. Published as peer-reviewed study in the American Journal of Infection Control \(AJIC\)](#)
2. A. Katie Fitton DO, Kimberly R. Barber PhD, Alison Karamon BS, Nate Zuehlke BS, Sara Atwell MHA, BSN, Susan Enright DO; "Long-acting water-stable organosilane agent and its sustained effect on reducing microbial load in an intensive care unit", Genesys Regional Medical Center, [Published AJIC 2017.](#)
3. Baxa, Dwayne, PhD, et al., In Vitro Evaluation of an Antimicrobial Surfactant Against Methicillin Resistant Strain of Staph. aureus and Pseudomonas aeruginosa, Infectious Disease Research, Henry Ford Hospital 02.01.2008 [Residual performance vs bacteria \(Gram +\) & \(-\). Peer-reviewed and published in AJIC.](#)
4. Baxa, Dwayne, PhD, et al, running title, Evaluation of Antimicrobial Surfactant, Room evaluation, Infectious Disease research, Henry Ford Hospital 02.01.2008 [Residual Performance broad spectrum](#)
5. Gerba, Charles, Ph.D, Sheri Maxwell, B.S. Assessment of Antibacterial Efficacy of Goldshield against MRSA and VRE, University of Arizona, April, 2, 2008 [Residual Performance two weeks](#)
6. Li, Shiyou, Ph.D, Research Professor, Stephen F. Austin University. Research Paper Virucidal Efficacy of GOLDSHIELD® Antimicrobial Used for Inanimate Environmental Surfaces, Feb. 19 2010. [Virucidal efficacy & cytotoxicity vs kidney tissue](#)
7. Li, Shiyou, Ph.D., Research Professor, Stephen F. Austin University, Research Paper Virucidal Efficacy of Goldshield 24 an Alcohol-free Hand Rinse Against H1N1, May 14, 2010 [Virucidal Efficacy skin sanitizer](#)
8. Blevins, Susan S., B.S., SM(ASCP), et al., Hand Sanitizer Study for Inanimate Surfaces (AOAC), Determining the Durable Protection over Twenty-four Hours Against MRSA, Aerobiology Laboratory Associates, Inc. March 12, 2010. [Residual 24 hour efficacy GS 24](#)
9. Alt, Nathan L., B.S. et al, [ISO Closed Patch Sensitization Study](#), Goldshield Treated Mask, GLP, NAMSA Laboratories, Northwood Ohio, Sept., 21,2007
10. Wildeboer, Samantha E.,B.S, M.S., MT (ASCP), et al., [Cytotoxicity Study using the ISO Agarose Overlay Method, Goldshield Treated Mask](#), GLP, NAMSA Laboratories, Northwood, Ohio, Nov. 29, 2007
11. Wildeboer, Samantha E.,B.S, M.S., MT (ASCP), et al., [ISO Skin Irritation Study, Goldshield Treated Mask](#), GLP, NAMSA Laboratories, Northwood, Ohio, Dec. 6, 2007

12. Cerven, Daniel R. M.S., [Acute Inhalation Toxicity/LC 50 in rats](#), Goldshield Procedural Mask, MB Research Laboratories, Spinnerstown, PA. March 2008.
13. Levine, Alan, PhD BS. MS Physics, BS PS, Laboratory Test of Goldshield Products on Wallboards, RJ Lee Group Inc., Monroeville PA, Dec. 14, 2005 [Residual mold and fungi assessment wall board material](#)
14. Lieun, Li, PhD, Determining the Antimicrobial Activity of a Bound or Incorporated Antimicrobial Agent(s) in Polymeric or Hydrophobic Materials, Against Escherichia coli, Klebsiella pneumonia, Aspergillus niger., IBCI Laboratories, Norcross GA, Nov., 2005 [In vitro evaluations on Gram \(+\) & \(+\) organisms](#)
15. Rozas, Elias B.S., Tuninskaya, Galina M.S., Burch Stewart, Ph.D. et al., Log Reduction of Staphylococcus au. (MRSA) on Ceramic Tiles Residual Goldshield Antimicrobial Effectiveness Tests on Products., Applied consumer Service Laboratory, Hialeah , FL, July, 26,2005 [Residual log reduction against MRSA](#)
16. IBCI Laboratories, An evaluation of AP Goldshield's Goldshield 5 antimicrobial on treated socks brand (GTB), IBCI Labs. Norcross, GA, Nov, , 2006 [Residual performance on textile socks 50 washes.](#)
17. Kassab, Douglas, Director, Clinical Support Services, UPMC Presbyterian Shadyside, GoldShield™ 5 Antimicrobial Test , UPMC, March 10 – April 24, 2008 [Residual Performance on Medical Equipment 4-6 weeks](#)
18. Pease, Thomas, et al, Gentex Corp., AATCC 100-2004: Assessment of antibacterial activity finishes on textile materials, Nelson Laboratory, July, 2005 [Residual Textile assessment 0 & 24 hours on DOD materials of GS](#)
19. Yarlet, Nigel, PhD, et al, Haskins Laboratory Pace University, GOLDSHIELD 05 technology Tested against MRSA (methicillin resistant Staphylococcus aureus) to Determine the Ability to Prevent the Formation of the Bacteria on Artificial Grass. Dec. 10, 2006 [In vitro evaluation of synthetic grass vs MRSA.](#)
20. Gentle, Thomas, PhD, Minntech Corporation, An Evaluation of Safety and Efficacy of the Crosstex® Procedural Face Mask treated with Goldshield® Anti-Microbial Agent., April3, 2008 [Medical Masks study against broad spectrum of organisms.](#)
21. Yarlet, Nigel, PhD, et al, Haskins Laboratory, Pace University, Evaluation of Goldshield Antimicrobial Treated Masks of Poylpropylene Against Methicillin Resistant Strain of., Staphylococcus aureus, Nov., 13, 2006 [Residual performance of GS vs MRSA on medical masks 0-24 hours.](#)
22. Rafa, Laura, RN, Infection Control Wheeling Hospital, Evaluation of the Goldshield Products for the Residual Antimicrobial Effects; Bio-Vapor System Compared to Existing Cleaning Regiments. (Hard Surface, Textiles, and Equipment) Dec. 29, 2009 [Hospital residual evaluation of GS on surfaces and equipment](#)

23. Russell, Arthur, et al, and NY Board of Education Staff, Residual Efficacy Study of Goldshield Treated Surfaces in Four New York City Schools, Dec. 1, 2006 **Residual performance 30 days in NYC schools**
24. Wilkerson, Christopher, et al EquipSystems, Environmental Testing Analysis of Goldshield Antimicrobial on Surfaces and Equipment, New York Athletic Club, Sept., 12, 2007 **Residual performance in athletic club GS 5**
25. Infection Control Department Oakwood Hospital-Healthcare Inc. Reduction of Bacteria Burden Oakwood Hospital. June 27, 2010 **Residual 30 day assessment of GS in hospital ICU's**
26. Studies Conducted by independent corporations, unnamed lab technicians: microbial Efficacy of Goldshield 5 CLEAR COATING on Metal Surfaces, ASTM Standards E1054, G21, G22, E1428, Samples: Bacteria Pseudomona aeruginosa b) Reduction/Inhibition Percentage Results for Application of Goldshield® 5 In Exhaust on Method to 100% Cotton Samples Against Staphylococcus aureus. Jan. 22, 2007. c) Goldshield Clear Coating Antimicrobial When Incorporated HVAC and Air Systems Metallic Materials, June 4, 2007 d) Antimicrobial Efficacy when Exhausted on Cotton and Poly-Cotton Materials, against Candida albicans, Aug., 26, 2007 **All in vitro analysis studies against broad group of substrates and organisms**

European Studies

All invitro studies for human and animal efficacy performance.

27. Morwood, K, BSc; C boil, Mi Biol, Product Goldshield 5; Microbiological Analysis Based on EN 1656 (2009); Quantitative suspension test for the evaluation of bacteriacidal activity of chemical disinfectants and antiseptics used in the veterinary field.
28. Crawshaw, C., MBIomed Sci; Product Goldshield 5; Microbiological Analysis Based on EN 1657 (2005); Quantitative suspension test for the evaluation of fungicidal or yeasticidal activity of chemical disinfectants and antiseptics used in the veterinary field.
29. Morwood, K, BSc; C boil, Mi Biol, Product Goldshield 24; Microbiological Analysis Based on EN 1656 (2009); Quantitative suspension test for the evaluation of bacteriacidal activity of chemical disinfectants and antiseptics used in the veterinary field.
30. Crawshaw, C., MBIomed Sci; Product Goldshield 24; Microbiological Analysis Based on EN 1657 (2005); Quantitative suspension test for the evaluation of fungicidal or yeasticidal activity of chemical disinfectants and antiseptics used in the veterinary field.
31. Morwood, K, BSc; C boil, Mi Biol, Product Goldshield 5; Microbiological Analysis Based on EN 1650 (2008); Quantitative suspension test for the evaluation of fungicidal activity of chemical disinfectants and antiseptics.

32. Duxbury, H., BSc (Hons); , Product Goldshield 24; Microbiological Analysis Based on EN 1276 (2009); Quantitative suspension test for the evaluation of bactericidal activity of chemical disinfectants and antiseptics.
33. Morwood, K, BSc; C boil, Mi Biol, Product Goldshield 5; Microbiological Analysis Based on EN 1650 (2008); Quantitative suspension test for the evaluation of bactericidal activity of chemical disinfectants and antiseptics.
34. Wen, Fen and Wenli, Liu; "Goldshield Test Assessment Antibacterial Masks; Air Flow resistance; Filtration Efficiency and Antimicrobial Activity." 05.20.2014
35. Cawdron, Danielle, Camden BRI Ltd. accredited UKAS testing laboratory; "Overall Migration from Food Contact Materials"; 03.27.2014
36. Dr. Chris Woodall, BluTest labs. Ltd., EN 14476 Chemical disinfectants and antiseptics Virucidal quantitative suspension test for chemical antiseptics used in human medicine. Test method (phase 2/step 1) Ebola efficacy.
37. Morwood, K. BSc (Hons) CBiol MiBiol. Goldshield 24. Microbiological Analysis Based on EN 1500 (1997) Chemical Disinfectants and antiseptics-hygienic hand rub (phase 2 /step2) June 8, 2012.
38. Crenshaw, Grant, PI Nurse, Ipswich UK Hospital Trust, "Assessment of microbial reduction and residual performance of a Goldshield antimicrobial in clinical training areas." October 2105.
39. Phelps, Mark, microbiologist, UK Underground Train study, "Three week residual microbial assessment of high touch surfaces on UK carriage". Dec 2016/ Agricultural Studies:
40. Parker, et. al, USDA; "Goldshield antimicrobial effect on citrus canker bacteria in vitro and in vivo" June, 2016
41. Williams, Steven, SAL laboratories; Goldshield antimicrobial reviewed in accordance with QP22 to assess leaching from citrus, May 2015.
42. Cawdron, D., Gr. Mgr. Campden BRI Ltd. Overall migration from food contact materials Report number: AC/REP/132045/138 w Issue date: 16" May 2014 In Aerospace Studies:
43. Dr. Kasthuri Venkateswaran (Venkat) Senior Research Scientist California Institute of Technology, Jet Propulsion Laboratory Biotechnology and Planetary Protection Group; M/S 89-2. Assessment of water stable organosilane (Goldshield] antimicrobial to prevent bio-film on space and ISS substrates.
